f trial by using Doctor Pierce's Favorite Pre-cription. It is the grand-

scription. It is the grandest strengthener for prospective mothers that was ever invented. Taken during the expectant period, it tones up the nervous system; gives vigor to the general constitution and imparts special power and endurance to the delicate organs concerned in parturition. It shortens confinement; makes delivery absolutely safe and comparatively easy; fortifies the system against relapse and promotes a supply of healthy nourishment for the child. For all women who have any weakness or disease of the organs distinctly feminine, Dr. Pierce's Favorite Prescription is the most perfect remedy ever devised. It is the only medicine of its kind invented by a regularly graduated, experienced physician. regularly graduated, experienced physician. regularly graduated, experienced physician.

INGALLS ON CLEVELAND.

The last day of Grover Cleveland! cause for universal joy, this alore would suffice. He went into power with none. The nation shares the relief with which be professes to anticipate liberation from the cares and bur-dens of State. If he has a hearty, cordial, sincere friend, advocate and ampion in either House of Congress, such a one lurks privily in ambush and makes no announcement.

Intrusted with plenary power by the people in 1893, the failure of his administration in every department stands confessed. His policy at home has been destructive, and abroad humiliating and ignominious. The decraded coalition by which he was elected made no promise that he has not violated, and gave no pledges that he has not betrayed. His tariff reform has afforded neither revenue for the reasury, protection for capital, nor wages for labor. His financial measures have restored neither confidence nor prosperity. Upon the preext of replenishing the gold reserve, the national debt has been increased and bonds sold to favored syndicates to meet deficiencies in the ordinary exenses of the government. His di plomacy has been apologetic and va-cillating to the verge of dishonor, saved only from infamy by its grotesque at d divert g imbecility.

The Hawaiian episole would be in credible in the prospectus of a comic opera. There has been no day in the past four years that has not witnessed ome new triumph in Clevelandismome bank closed; some railroad in the hands of a receiver; some merchant broken; some furnace extinguished; some maimed and disabled veteran stigmatized and branded with dishonor, driven to the asylum or the grave. Boasting of his robust and incorruptible integrity, he retires with a vast fortune accumulated during the most disastrous period of his country's history, in which millions have been reduced from Fflu ence to want, and from poverty to beg

gary.
History will record its incredulity that such an impostor could so long escape detection. He is the central figure of one epoch to which no lover of nis country will ever revert without the dush of indignant sname at struction of its resources and the deg radation of its dignity and honor; a period that has no parallel except in the time of Walpole, described by Ma-caulay as "the era of dwarfish talents and gigantic vices; the paradise of cold hearts and narrow minds; the golden age of the coward, the biggs age of the coward, the bigot and the slave." He bequeaths to his successor falling revenues, disordered finances prostrated industries and social discontent, which has already obliterated po-litical frontiers and will compel the readjustment of parties to meet the conditions of the revolution upon which we have entered. With a belligerent and mutinous Senate, becoming constantly more jealous of its prerogatives, the new chief magistrate will be com-pelled to tread the paths of his feet with with circumspection. He must take heed how he stand lest he fall. The people are fatigued with adversity. They are tired of hard times. They anticipate some miraculous and supernatural return of prosperity. Popular fancy de-picts McKinley standing like Moses at Horeb, to whom Hamilton was likened by Webster in his magnificent apos trophe: "He smote the rock of the na-Dr. King's New Discovery for Consumption.

Why is It,

if catarrh is a blood disease, as some claim, that physicians frequently advise change of air and climate to those suffering? Catarrh is a climatic affection, and nothing but a local remedy or a change of climate will cure it. ticnal resources and abundant streams of revenue gushed forth; he touched the dead corpse of the public credit and

it sprung upon its feet."
But the menacing manifesto of the silver republicans dispels the hope of a sate administration majority in that body and makes the fate of the tariff bill, which has been already prepared,

extremely precarious.

Meanwhile, with the warehouses rapidly filling with the importations of all commodities whose price would be increased by the new bill, the prospect of increased revenues from customs duties is not very encouraging. It is perhaps too much to expect that the President will abandon the system with which his name and fame are so indissolubly associated and to the promotion of which he stands pledged, but to the cisinterested observer it looks as though

an additional tax on beer, whisky, to-bacco and some of the other necessaries

of life would be the safest and easiest

expedient for meeting the emergency.
Incidentally the attitude of the Sen ate emphasizes the demand that the constitution should be so amended as to provide for the election of Senators by vote of the people. The fathers of the republic distrusted the capacity of the people for self-government. They endeavored to denrive them of Had the American people no other direct power in the selection of the cause for universal joy, this alore President and Senate. But the great scandals and reproaches of our politics have not come from the immediate with much opposition. He goes out suffrages of constituencies, but rather from the culpable intrigues of unscrup-ulous leaders and the venality of cor-

ropt legislators Experience proves that the wildest excesses of popular liberty are preferable to the dangers of its denial, how ever placid and splendid and gilded the substitute may be.
